Dealing with Detrimental Energies-

How to Keep Yourself & Your Space Clear!

Sensing Energy

Have you ever walked into a room that just didn't feel right and then found out that the occupants had just been arguing? Or you felt uncomfortable in a place for no obvious reason and then found out that it was the site of a tragic event? Perhaps you've been around a particular person and felt drained as if someone sucked all the air out of your balloon? Or have you suddenly been bombarded with thoughts or emotions that didn't seem to be your own? Have you been unable to get a good night sleep in your own bed but have no trouble sleeping elsewhere or vice versa?

In my article, [“Picking Up Vibes”](#), I talk about different kinds of energies - some feel good, and some don't . **Energy has a profound effect upon our health, mood, and overall functioning. So keeping it high is critically important. This class addresses the many types of detrimental energies and what to do about them.**

We will discuss:

- geopathic zones,
- mental and emotional residue, frequency and imprint from current or previous inhabitants/owners has upon an object or space,
- psychic cords, traumatic residue, wounds, objects and implants in the body or field,
- vows and agreements,
- psychic attack, projection of negative thoughts and emotions,
- ghosts, entities and inter-dimensional beings, and attachments,
- mind-control and detrimental radionics,
- black magic, curses including those that follow you and your relatives through time,
- elementals and nature spirits,
- portals, doorways and more!

We will go through multiple methods used by dowers and energy healers throughout the country .A necessary part of this to heal any vulnerability to such detrimental energies or they come back. This class is not intended to train you as an exorcist, but it *will* assist you to stay out of harm's way, be proactive in basic self-care, address your own vulnerabilities so that while you may notice detrimental energies, they do not stick to you, and you will know immediate remedies to take. You will also know when to call for professional assistance instead of trying to tackle something yourself.

How to Easily & Effectively Harness Inner Resources for Problem Solving and Stress Relief with the Infinite Intelligence Process

- *What if a part of you already knows everything about you, your challenges and issues, why you are the way you are, and how to help you in a way in which you are really pleased?*
- *And what if that same part could be tasked to help you to solve any problem and achieve any goal with grace and ease even while you sleep or go about your day?*
- *What if that part could also quickly discharge unnecessary stress, negative beliefs and judgements quickly and effectively any time, any place below the level of conscious awareness?*
- *And what if you could quickly process all the events of the day, the challenges, the upsets, and the nightly news so that you could sleep more peacefully through the night?*

Would it be worth your time to come and learn how?

The Infinite Intelligence Process is an easy way to access unlimited resources and the wisdom within to solve practical problems, relieve stress, and heal from even long-standing issues.

Assign tasks to your High Self to work behind the scenes to harness those inner resources to find or create the ideal solution even while you sleep or are busy with other things.

Install a hypnotic or dowsing program that you deliberately trigger with a cue word and set up phrase to resolve and clear the root cause and other factors involved in even long-standing detrimental beliefs and emotions, patterns and issues.

Assert your authority as creator and sovereign being to declare what you want to manifest in your life with greater speed, efficiency and ease.

The **Infinite Intelligence Process** that is a 2-prong modality has been synthesized by Roxanne Louise from traditional hypnosis and dowsing methods with newer, short-cut energy healing techniques to bypass the limitations of the conscious mind. It circumvents the ego, any internal and external blocks, and inhibiting energies to get the job quickly and painlessly.

It can be combined with the Emotional Freedom Technique, Ho'Oponopono, Emotion Code, Spirit Releasement, Spiritual Committees, and the Law of Attraction. It can be used also for mental, emotional, physical and spiritual healing, releasing guilt and shame and the need for punishment, and clearing blocks and underlying causes behind any issue or problem. It can also be used to clarify and align with the meaning or purpose for your life. It meshes completely with the class "Creating Flow" and Roxanne's book [Therapeutic Dowsing and Telepathic Healing](#).

The Infinite Intelligence Process is easy to learn, works very fast, can be done anytime, anyplace, and is adaptable by ordinary people to real life issues and situations. Use it yourself daily to make your life easier and less stressful. And teach it to others!

Based on her book, [Accessing More, Tapping into the Eternal, Unlimited Self](#).

Heal Yourself to Heal Your World!

“Before you can help make the world right, you must be made right within.” John Miller

What’s wrong?

It is very easy to compile a lengthy list of what is wrong in the world. Society has traditionally tried to address those wrongs through a top down approach of rules and regulations, and the legal and judicial system. Whether through political movements & elections, or marches, protests, petitions, and ever more rules, regulations, laws enforced by police, court system, prisons, any improvements have historically been temporary and partial. And the hope that the problems will go away by changing the laws or the politicians has been very disappointing all around the globe.

But more laws cannot and has not stopped bad behavior.

People will and have found a way around them. Furthermore, a top down approach makes you dependent upon others to write and execute new laws and enforce them. And if those people are themselves corrupt, new laws, new systems, will not change the underlying evil and abuses. This can make you feel hopeless and powerless, which drains the very energy you need in order to take effective action to stop such abuse. Consequently, the problems continue.

Physicist, **Tom Campbell** says that

- **Simply replacing the leaders or the system will not result in real, long-term improvement unless the consciousness of the populace changes.** One dictator or set of crooks will be replaced by others until the population no longer supports them.
- **Unless WE change, real, permanent change will not happen. But as we grow and evolve in consciousness, our leaders and systems will reflect that.**

Because as Stephan A. Schwartz says *“we are in this matrix of consciousness where all life and all consciousness is interconnected, we cannot really design the solutions”* [to world problems unless we recognize that] *“working with consciousness is one of the ways we can achieve not only personal well being but social well-being”* as well. ...*there is no greater power than the collective intention of a large group of people. It can change politics. It can change physical reality. It can effect healing....Consciousness is the fundamental we are dealing with...You have the power through your intention to literally alter the circumstances of your physical surroundings...and the structure of reality.”*

Come learn some simple ways to get started including how to use your very irritations as a framework for healing both self and the planet of any resonance.
